DETAILED ACTION***Response to Arguments***

Applicant's arguments filed 9/23/04 have been fully considered and are deemed persuasive. Applicant's arguments are part of an Appeal brief. Applicant argues that his invention contains evaluation means capable of determining both of the cases: that a starting synchronization has been recognized or further synchronization succeeded by a correct word synchronization has been recognized and for evaluating data words received each time subsequent to a recognized starting synchronization that is succeeded by a word synchronization or received subsequent to a recognized further synchronization that is succeeded by a correct word synchronization. The examiner recognizes that in this case the "or alternatively" does not constitute an "either / or" situation, but any device meeting the limitation must be capable of performing both cases since this represents the overall picture for achieving the rapid synchronization. Applicant has put forth a detailed argument for supporting the notion that none of the referenced prior art is able to provide synchronization without recognizing the starting synchronization which would mean that his invention causes a faster synchronization since it does not have to wait for a cycled starting synchronization. Applicant takes on the notion of the Sriram supporting reference as a source of recognition of further synchronizations without the need of recognizing the starting synchronizations. The examiner concurs with applicant findings.

Allowable Subject Matter

Claims 1-6 are allowed.

Art Unit: 2684

The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 6, the examiner in agreement with applicant's arguments throughout the prosecution of the case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
